

Verification Before Action — Module

[Jump to: Checklist | Verification Log](#)

Case Study: Verifying Claimed Agency Enforcement After a Fire

This module teaches how to verify claims of agency authority before those claims are relied upon. It focuses on process, documentation, and attribution — not blame.

Verification Checklist

[Back to: Case Study | Verification Log](#)

- Identify the claim (agency, action, area affected).
- Identify the source and their role.
- Request primary proof (order #, notice, inspection date).
- Check physical indicators (tags, seals, notices).
- Separate safety conditions from formal authority.
- Use verification-safe language until confirmed.
- Record outcome (verified / unverified / pending).

Verification Log (Fillable)

Use **Verification_Log_Fillable.pdf** to document claims, sources, proof requested, and outcomes.
